experiences.**

**CH  
&CO**

At CH&CO we strive to expand pupils' horizons and promote all-round wellbeing through our food experiences.

Our approach is uniquely shaped by pupils. We influence them, as they influence us – harnessing their ideas and insights every day.

In return our chefs inspire a love of food, helping them understand the importance of balanced nutrition while championing curiosity and adventure through flavours and cultures.

Whatever their role, our entire team embed themselves into school life, helping to create a nurturing environment where the pupils, school and wider community can thrive.

### Championing curiosity and adventure

Innovative menus. Creative themed events. Unique pop-up experiences. We create a sense of excitement around mealtimes.

We have a fantastic team whose love of food helps to create an energy and environment where pupils are encouraged to explore new flavours, textures and cuisines and celebrate their individuality.

From theme days linked to key date events, the school calendar or the curriculum to pop-ups from around the world, one-off house events or a visit from our partner chefs, our experiences generate a buzz around the dining room.

Student wellbeing starts with our nutritionally balanced menus. Beyond that we support pupils with age-appropriate communications, initiatives and events that support them in understanding the importance of food choices for healthy living, helping them to form good habits at an impressionable age.
